Welcome to Haulz-All – the most comprehensive line of powered haulers for contractors, home owners and businesses. Here you will find information on the Uber Mover™ line of powered carts, motorized wheelbarrows and self propelled hand trucks.

Haulz-All equipment is designed to provide safety and productivity at a reasonable cost. The machines are nimble yet powerful enough to move up to 650 pounds. All Uber Mover power products use reliable, high ratio gear drives (no belts, pulleys, chains or sprockets) coupled to powerful DC motors. Every machine is controlled by a very sophisticated digital controller that provides positive control at all speeds in forward and reverse, as well as excellent safety features such as electronic regenerative braking. The operator interface (also called the throttle or speed control) has been life- tested excess of 500,000 cycles, and is completely intuitive so users can quickly master the operation of each machine.

Gasoline powered wheelbarrows and carts may provide slightly more hauling capacity, but they typically cost 2 to 4 times more than Haulz-All machines. Furthermore, Haulz-All customers do not have to endure noise, pollution, hot exhaust pipes, and high maintenance requirements common with gasoline powered machines
